

BraceNBlock™ Edge

24" Metal Silt Fence

BraceNBlock™ Edge Metal Edging Products Allow You To Easily Handle Your Installation Needs And To Create Beautiful Landscapes With Their Innovative Advantages, Benefits, And Multiple Uses

BraceNBlock™ Edge 24" Metal Silt Fence

- Attractive design.
- Durable, long lasting, and sturdy.
- Unique, patented, double sided, mesh design allows it to adhere to and grab the surrounding soil holding it securely in place and resulting in excellent soil retention. This innovative erosion and sediment control technology prevents washouts under the silt fence which is one of the major problems with traditional silt fence installation.
- Water permeable allowing better soil retention and erosion control while allowing excellent water drainage.
- Can be used as a retaining wall.
- Easy to use and install.
- Bendable and flexible allowing it to conform to any installation need.
- Lightweight and easy to handle.
- Easy to cut.
- Installation is easier, faster, and less laborious.
- Contractor grade product ideal for those who want professional quality results.
- Replaces conventional edging products with its advantages, benefits, and multiple uses.

BraceNBlock™ Edge Construction (Patented Design)

- BraceNBlock™ Edge's patented, double sided, mesh design enclosing a water permeable root blocking fabric braces soil and water; blocks plant roots, tree roots, and weeds from entering tended areas; and maintains its beauty year after year.
- BraceNBlock™ Edge provides maximum soil anchoring. Its unique, patented, mesh design allows it to adhere to and grab the surrounding soil and allows plant roots to grab it keeping it securely in place. It will remain symmetrically vertical in the ground when properly installed and you get no washouts under the silt fence.

BraceNBlock™ Edge Construction (Metal)

- BraceNBlock™ Edge is made of heavy duty, double sided, galvanized™ metal wire mesh coated with vinyl that is durable, strong, sturdy, and long lasting yet flexible. Ultra Violet inhibitors block sun rays for maximum vinyl durability.
- Professional, heavy gauge construction and quality for all of your commercial and residential projects.
- BraceNBlock™ Edge is resistant to insects, weather, and exposure to chemicals such as plant fertilizers, insecticides, and herbicides which are normally found in gardening, agricultural, and construction settings.
- BraceNBlock™ Edge will not chip, crack, rot, rust, split, or fade at any temperature.

BraceNBlock™ Edge Construction (Root Blocking Fabric)

- BraceNBlock™ Edge uses a root blocking fabric that is permeable to water, air, oxygen, nutrients, chemicals, and fertilizers through millions of tiny holes while blocking plant roots, tree roots, and weeds and conserving soil moisture.
- A landscape edging with built-in drainage system. Stops flooded plant beds.
- Blocks the horizontal growth of plant roots from growing into the garden bed when placed at the bed edge (ex. liriope, monkey grass, lawn grass, weeds, etc.) while allowing excellent bed drainage.
- BraceNBlock™ Edge blocks tree roots from entering garden beds when it is placed around the perimeter of the bed 12" below ground.
- Can be used vertically in pots to keep plant roots separated one from another such as herbs.
- Can be used by nurseries to keep seedling roots separated one from another.
- Weed block fabric has no dangerous chemicals to leach into the ground.

U.S. Patent Nos. 6,108,972; 6,189,263; 6,230,439; 6,270,286; And Foreign Patent Rights Pending.

Cat. No.	Size	Color	Ship Wt.
24MSF	24" X 25'	Black	19 lbs

- Unique, patented, double sided, metal, mesh design allows it to adhere to and grab the surrounding soil holding it securely in place and resulting in excellent soil retention. This innovative soil erosion and sediment control technology prevents washouts under the silt fence which is one of the major problems with traditional silt fence installation.
- Water permeable allowing better soil retention and erosion and sediment control while allowing excellent water drainage.
- Can be used as a retaining wall.
- Easy to use and install.
- Bendable and flexible allowing it to conform to any installation need.
- Lightweight and easy to handle.
- Easy to cut.
- Installation is easier, faster, and less laborious.
- Contractor grade product ideal for those who want professional quality results.
- Simple, easy silt fence installation instructions:
 - Dig an 8 inch deep trench along the silt fence alignment.
 - Drive steel or hardwood wooden posts 36 inches long at least 16 inches below the ground along the trench every 6 to 8 feet and at splice locations.
 - Place BraceNBlock™ Edge Silt Fence in the trench at least 8 inches below the ground, overlap the ends at least 6 inches at the splice locations, and wire the silt fence to the posts.
 - Backfill the trench and compact the soil on both sides of the silt fence.
